• BATCH PROCESSING

JetPay® Batch Processing is secure, fast, and efficient. You can process more transactions and better manage your business with JetPay. It offers the convenience of a payment processing system based on tomorrow's Internet technology.

JetPay® offers Batch Processing services for customers who need large quantities of transactions processed at once. JetPay Batch Processing delivers a convenient method to authorize transactions and deposit money for many customers securely and efficiently.

FAST AND SECURE TRANSACTIONS

JetPay Batch Processing uses the fastest transaction throughput available. And you have access to online reporting within seconds. JetPay Batch will support more than 400 transactions per second.

JetPay's data capture capabilities enable you to create richer purchaser information and track marketing and promotional programs. The private reporting fields capture non-standard data that is reported online through report generation. The standard fields include four fields of 64 characters each.

Complete and customizable fraud screening tools and velocity checking protect JetPay's processing. Standard 128-bit digital secure sockets layer (SSL) encryption secures all business processes. Deliver files or retrieve files through an Internet secure FTP process without expensive leased lines or slow dial-up lines.

THE POWER OF JETPAY

JetPay delivers efficient, fast, and secure batch processing for your business needs. Combine JetPay Batch Processing with JetPay Recurring Payments and Transaction Recycling solutions for a suite of products that is completely unsurpassed. ■
