

• MORE CASH TO YOU

Putting you in charge.

“Standard Payments brought us up to speed on the data formatting requirements for bankcard sales originating by telephone and via the Internet. Their solutions have made order processing for both sales channels more automated, and we’ve seen a real reduction in chargebacks and transaction processing fees.”

—Don Wolanchuk,
Manager, TWC Surf & Sport

IT’S A FACT.

Paying a low discount rate, and reducing your organization’s transaction processing costs to the greatest extent possible, now depends almost entirely on compliance with Visa’s and MasterCard’s growing body of operating regulations for data formatting and submission of correctly populated transaction records.

IT’S A FACT.

Standard Payments® is committed to **putting you in charge** by monitoring for compliance with association regulations—which is the primary driver of cost and chargeback risk. We stand alone in having the organizational and product skill set required to manage the various (and serious) implications of non-compliance.

IT’S A FACT.

Paying a low discount rate requires a relationship with a merchant services provider with the ability to identify and deliver the optimal payments acceptance solution for your organization. Standard Payments evaluates processing methods, transaction mix, the nature of your business, and its payments acceptance environments to determine the best solution for you.

IT’S A FACT.

Standard Payments can develop and deploy a solution that will address your organization’s specific payments acceptance needs. Contact us now for details on the features, functionality, and benefits of our products or to request a no cost, no obligation payments processing analysis. ■
